EPA I.D. No. COD097144588

U.S. ENVIRONMENTAL PROTECTION AGENCY, REGION VIII
WASTE MANAGEMENT BRANCH

RCRA INSPECTION REPORT

DATE OF INSPECTION: October 13, 1982

FACILITY: Amax Extractive Research & Development

LOCATION: 5950 McIntyre Street
Golden, CO 80401

CONTACT: Mr. John Schacelfer

NOTIFICATION: Generator

TYPE OF INSPECTION: Routine RCRA

PARTICIPANTS: Mr. John Schacelfer, Amax Environmental Coordinator
Mr. Mel Poundstone, USEPA
Mr. Randy Lamdin, USEPA

WEATHER CONDITIONS: Partly Cloudy 50° F

TIME IN: 2:45 p.m.

TIME OUT: 3:30 p.m.

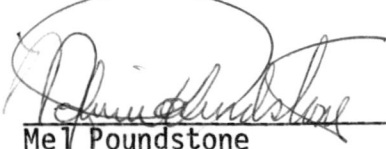

The EPA inspectors met Mr. Schacelfer as prearranged and presented credentials.

Mr. Schacelfer advised the inspectors that the facility does research, primarily on mining processes, and that the wastes produced are exempt due to the "mining exemption."

He produced manifests indicating that on March 26, 1982, Amax had shipped 2,100 gallons of solvents to OSCO for recycling; on April 9, 1982, various small quantities of exempt mining wastes were shipped to CWMI; and on October 12, 1982, 700 gallons of waste gear oil were shipped to Approved Drain Oil for recycling.

All manifests appeared to be in good order.
